Billions of hard earned dollars are spent annually in the United States on termite damage and control measures on one of your most precious investments - **your home**. With more than 60 years experience, we at NTTTS are confident that we will satisfy your concerns with our no frills **TERMITE WARRANTY PROGRAM**. With our protection plan, we offer you an honest pledge of no hassle protection! That's right **NO HASSLE**, no problems. Our agreement targets termites alone. Our Agreement is **VERY SIMPLE**, not several pages of confusing legal terms that give you the feeling everything has been excluded. It's a simple, honest pledge to protect your largest investment.

SELLERS:

Make your home more attractive to buyers. Finding termites can be a real deal breaker! Prepare your home for a smooth transaction. With our recommendations from the initial inspection, you can remove many conducive conditions that will be found in real estate inspections.

BUYERS:

Don't lose sleep over termites. This policy transfers with no additional fee at closing of sale. One less thing to worry about.

All termites have a "thick waist" where their abdomen is joined to their middle region (thorax.)

All termites have antennae that look like a "string of beads;" but all ants have distinctly "elbowed" antennae.

How to tell ANTS from TERMITES.

Termite swarmers have two pairs of long narrow wings with very few clearly visible veins, and both the front and back pair are nearly equal in size and length. Winged ants have pairs of wings with separate distinct cross veins, shaped like long triangles and the back pair is much shorter than the front pair.
